

ZACROS Group Environmental Policy

ZACROS Corporation and ZACROS Group companies recognize that the preservation of the global environment is the most important issue common to all humankind, and will assess the impact of their business activities on the environment and promote activities aimed at reducing environmental impact. We will also strive to develop and propose environmentally friendly products and services and contribute to environmental improvement through activities.

Environmental Management Activities

1. We will build environmental management systems in our effort to prevent pollution and improve continuously.
2. We will comply with legal requirements and other requirements we have agreed with.
3. We will set our environmental purpose and targets, review them as appropriate, and strive to improve our environmental conservation activities.

Communication

4. We will promote activities to raise environmental awareness among employees, business partners, and customers.

Environmental Improvement

5. We will strive to prevent global warming, curb climate change, and promote energy conservation activities.
6. We will strive to minimize waste by conserving our resources and promoting recycling activities.

Other

7. We will make these environmental policies open to the public.

Date of enactment May 27th, 2009
